

VYRALIFY V3 — MASTER DEVELOPMENT ROADMAP

Phase-by-Phase Technical Architecture & Execution Plan

Source of Truth: V3 Final Product Specification & Panels Structure | Scope: Core SaaS Platform OS | Version: 3.0 Final

1. Executive Overview & Single-Sided Positioning

Vyralify is an AI-powered SaaS operating system for Instagram creators and page owners. It serves a single-sided audience through two unified onboarding paths: **(1) Existing Creators** looking to automate engagement, scale content velocity, and boost revenue; and **(2) Complete Beginners** looking to launch a theme page from scratch, select a high-opportunity niche, and monetize quickly.

Core User Journey:	BUILD (Page Builder) → DISCOVER & CREATE → AUTOMATE (Instagram Automation) → MONETIZE (Store & Commerce) → MEASURE (Home Dashboard) → OPTIMIZE (Vyralify AI Assistant)
The 6 Core Modules:	Home • Overview, Page Analytics, Sales Tracker, Revenue Tracker, Recommendations, Quick Actions Vyralify AI Assistant • Ask Vyralify Anything, Multimodal Media Critique, Context Memory Page Builder • Niche Selector, Import & Audit, Objectives, Profile Setup, Multi-Page, Demographics Discover & Create • Trending Feeds, Viral DB, Niche Benchmarks, Competitor Tracking, Scripts, 30-Day Planner Instagram Automation • DM Keywords, Comment Replies, Story DMs, Lead Collector, AI Inbox Store & Commerce • Link-in-Bio Storefront, Winning Products Library, Digital Goods, Orders CRM
Explicitly OUT OF SCOPE:	- Marketing/landing website (built separately post-product) - Brand-side/campaign marketplace features - Video clipping / creator payout infrastructure - Multi-user / team accounts / collaborator roles in v1

2. Global Architecture & Core Data Stores

The application is engineered around a reactive, multi-page context model where all analytics, content, automations, and store products are strictly scoped to the active selected Instagram profile.

- Multi-Page Context Switcher:** Persistent top-nav dropdown scoping all 6 modules. Switching pages instantly recalculates metrics without full reload.
- Auth & Session Management:** Firebase Client SDK with Email/Password, Google OAuth, Apple OAuth, 2FA, session tracking, and device management.
- Soft-Lock Plan Gating:** Gated features remain visible with lock badges, blurred previews, and contextual upgrade modals (never broken buttons).
- Credit Metering Safety:** Non-disruptive warnings at 80% usage and soft upgrade prompt at 100% (never cuts off in-flight responses).

3. Pricing Tiers & Usage Limits Matrix

Full Feature Comparison Across Free (Starter), Pro (■499/mo), and Elite (■1,499/mo)

Vyralify deploys a 'Hooked, Then Upgrade' monetization framework. The Free tier provides immediate value during the initial session so users experience the 'aha moment' before encountering limits on subsequent usage.

Feature / Module	Free (Starter)	Pro (■499 / mo)	Elite (■1,499 / mo)
Connected Pages	1 page	Up to 3 pages	Unlimited pages
AI Credits (Combined)	20 / day	300 / day	Unlimited credits
AI Assistant Chat	Basic Q&A only	Deep strategy & analysis	Full + priority response speed
Chat Media Uploads	3 uploads / month	50 uploads / month	Unlimited uploads
Conversation History	Last 5 conversations	Unlimited history	Unlimited history + search
Niche Selector Quiz	Included	Included	Included
Page Builder & Audit	1x full audit	Unlimited re-audits	Unlimited + priority depth
Audience Demographics	Basic overview	Full breakdown	Full breakdown + CSV export
Discover Trending Feed	Limited category filters	Full filters & formats	Full + early access trends
Competitor Tracking	1 competitor slot	10 competitor slots	Unlimited competitor tracking
Niche Viral Database	View-only mode	Full access to viral DB	Full access + weekly drops
30-Day Content Planner	7-day planner (manual)	Full 30-day planner (auto)	30-day + AI auto-fill + bulk
Instagram Automation	LOCKED (Soft-lock preview)	Up to 3 active automations	Unlimited active automations
Lead Collector CRM	LOCKED	Included	Included + advanced segmentation
AI Inbox Auto-Chat	LOCKED	Limited monthly chats	Unlimited auto-conversations
Link-in-Bio Storefront	1 product / link	Unlimited products	Unlimited + custom branding
Winning Products Library	View only (can't import)	Full access & 1-click add	Full access + priority drops
Orders & Sales CRM	Basic (view only)	Full order management	Full management + CSV export
White-Label AI Resale	Not available	Not available	Exclusive Included
Customer Support	Community / Help Center	Standard Email Support	Priority Support (Fast-track)

Phase 1 — Global Foundation, App Shell, Auth & Dual Onboarding

FOUNDATION • CORE PREREQUISITE • APP SHELL

Establishes the entire application layout, persistent multi-page routing context, authentication security, and the branching onboarding wizard for both beginner and existing page owners.

- **Global State Architecture:** Implement AuthContext (user, tier, credit counters), PageContext (multi-page context switcher scoping all modules), PlanGatingContext (soft-lock UI with upgrade modal), and NotificationContext.
- **Premium SaaS App Layout:** High-craft obsidian/emerald navigation shell with persistent Left Sidebar (6 core panels + Account/Settings), Top Bar with Multi-Page Dropdown, Cmd+K Search trigger, AI Credit pill meter, and notification bell.
- **Authentication & Security:** Email/password signup, Google & Apple OAuth simulation, email verification, password reset, rate-limiting on failed attempts, ToS/Privacy acceptance, and explicit AI data-processing consent checkbox.
- **Branching Onboarding Wizard:** Step 1: Account setup → Step 2: Core Branching Question ('Do you already have a page or starting from scratch?') → Path A: Meta OAuth connect & audit; Path B: Niche Selector Quiz & Opportunity Score → Step 3: Objective setting → Step 4: Land on Home with tailored checklist.

Phase 2 — Home Dashboard & Cross-Module Intelligence

MEASURE • FIRST SCREEN AFTER LOGIN • CORE OVERVIEW

The single-glance central dashboard summarizing page growth, content performance, storefront revenue, and proactive AI recommendations.

- **Overview Dashboard:** 4 top KPI cards (Followers, 7-day Views, 30-day Revenue, Engagement Rate) with 7d/30d percentage trends.
- **Page Analytics:** Reach, impressions, engagement trend curves, top performing and worst performing post breakdowns.
- **Sales & Revenue Trackers:** Live stream of recent storefront transactions, sales curves, and revenue breakdown by source (digital products, services, affiliates).
- **AI Recommendations Widget:** Top 1–3 data-driven suggestions with 1-click deep-linking into the AI Assistant with pre-loaded context.
- **Quick Actions Bar & Zero-States:** Instant buttons ('Create Content', 'View Store', 'Check Automations', 'Ask AI'). Empty accounts display helpful onboarding states, never blank or broken charts.

Phase 3 — Page Builder & Official Niche Taxonomy System

BUILD • TAXONOMY & IDENTITY • AUDIT ENGINE

Where a page identity gets defined, audited, and optimized. All downstream content tools and AI recommendations filter by this structured niche taxonomy.

- **Official 8 Niche Taxonomy:** Business & Money, Self-Improvement, Health & Fitness, Fashion & Beauty, Cars & Automotive, Travel & Lifestyle, Entertainment, Sports (extensible enum with defined sub-niches).
- **Niche Selector & AI Quiz:** Guided quiz for beginners calculating profitability and opportunity scores per niche.
- **Import Page & Meta Connect:** Instagram account OAuth integration pulling live bio, profile pic, follower metrics, and running an automated Page Audit (Strengths & Gaps scorecard).
- **Positioning & Profile Setup:** AI Bio Generator, positioning statement builder, and Instagram Story Highlights architecture.
- **Multi-Page Management:** Connected accounts dashboard with 1-click switching, disconnection, and Free tier 1-page soft-lock.
- **Audience Demographics:** Visual breakdown of follower age brackets, gender distribution, top geographic locations, and active hours heatmap.

Phase 4 — Vyrality AI Assistant (Domain-Grounded Co-Pilot)

OPTIMIZE • CROSS-CUTTING AI BRAIN • STRATEGY ENGINE

A conversational AI assistant built specifically for Instagram growth mechanics, retention benchmarks, and live page data reasoning.

- **'Ask Vyrality Anything' Chat Interface:** Multi-turn, context-aware chat thread trained on retention spikes, hook patterns, and niche benchmarks.
- **Grounded in Real User Data:** Directly references the active page's real analytics, top posts, follower growth, and store products in answers.
- **Conversation History & Search:** Persistent chat history drawer with full keyword search and session naming.
- **Multimodal Media Upload:** Upload screenshots (analytics charts, competitor posts) or video thumbnails for visual AI critique and scoring.
- **Action Buttons in Responses:** Generates interactive action buttons ('Create Script in Create', 'View in Discover', 'Add DM Trigger').
- **Credit Metering & Warning Banners:** Real-time credit deduction, 80% usage warning banner, and 100% upgrade prompt without disrupting generated answers.

Phase 5 — Discover & Create Engine

DISCOVER & CREATE • CONTENT VELOCITY • 30-DAY PLANNER

Find what is currently working in the user's specific niche and immediately transform those viral insights into ready-to-post scripts, hooks, and planned schedules.

- **Discover Feed:** Real-time trending content feed filterable by official niche taxonomy, post format (Reels, Carousels), and date range.
- **Niche Viral Database:** Searchable archive of verified viral posts with retention breakdowns and hook breakdowns.
- **Competitor Tracking:** Monitor competitor accounts and posting cadence (1 competitor on Free, 10 on Pro, Unlimited on Elite).
- **Scripting & Hooks Studio:** Full script generator for Reels/Videos with proven opening hook formula variations and caption generators.
- **30-Day Content Planner & Calendar:** Interactive calendar scheduling (7-day view on Free, full 30-day on Pro, AI auto-fill on Elite).
- **Saved Research & Templates Library:** Bookmark trends and reuse proven high-converting templates.

Phase 6 — Instagram Automation & Conversion Engine

AUTOMATE • LEAD & SALES ENGINE • META SAFEGUARDS

Automate comment replies, DM keyword funnels, and AI-driven inbox conversations to convert engagement into customers while maintaining strict Meta compliance.

- **Free-Tier Soft-Lock UI:** Complete module soft-locked for Starter tier with interactive preview and upgrade trigger.
- **Trigger Automation Builders:** DM Keyword → Message, Comment → DM/Reply, and Story Reply → Message builders.
- **Follow & Lead Collector:** Captures new engaging followers into an exportable CRM table.
- **AI Inbox Auto-Conversations:** Back-and-forth conversational AI qualifying leads and answering follower inquiries automatically.
- **Automation Analytics & Meta Safety:** Real-time trigger counts, conversion rates, rate-limiting queue, and human-override fallback path.

Phase 7 — Store & Commerce (Link-in-Bio Storefront)

MONETIZE • CREATOR REVENUE • BIO COMMERCE

A high-converting single-page link-in-bio storefront (vyrallyfy.in/u/username) where creators list digital products, services, and affiliate offers.

- **Storefront Builder:** Customize branding, theme colors, bio, and product card order with live mobile preview mockup.
- **Product Management:** Create and edit Digital Goods, Services/Consultations, and Subscriptions (1 product on Free, unlimited on Pro).
- **Winning Products Library:** Curated catalog of ready-to-sell digital products and affiliate offers to import with 1 click.
- **Public Customer Storefront:** Ultra-fast, mobile-optimized public checkout experience for followers.
- **Orders & Customer CRM:** Transaction log, fulfillment tracking, refund management, and CSV export.
- **White-Label AI Resale:** Elite-tier feature allowing users to rebrand and resell Vyrallyfy AI on their own storefront.

Phase 8 — Account Settings, Billing & QA Hardening

SETTINGS • COMPLIANCE • QUALITY ASSURANCE • HARDENING

Account management, multi-currency billing, session security, and exhaustive zero-state and edge-case verification across all modules.

- **Account & Security Settings:** Profile details, password reset, 2FA setup, active sessions list with 'Log out of all devices'.
- **Timezone & Currency Preferences:** Dynamic switching between INR (₹) and USD (\$) across all pricing, analytics, and revenue trackers.
- **Billing & Subscription Portal:** Plan upgrade/downgrade flows (Razorpay/Stripe simulation), invoice history, and cancellation handling.
- **Exhaustive QA Checklist Verification:** Zero-states for new accounts, soft-lock verification, token expiry handling, rate limit backoffs, and cross-module data synchronization.

4. Cross-Module Data Dependencies & QA Protocol

How all 6 modules interact and maintain real-time data synchronization.

Module	Reads Data From	Writes / Feeds Data To
Vyralify AI Assistant	Home, Page Builder, Discover & Create, Automation, Store (Cross-cutting read access to entire page context)	Conversation history, action deep-links into Create & Discover
Home (Dashboard)	Instagram Graph API (reach, views), Store & Commerce (revenue), Automation (activity feed)	Central executive view, recommendations launchpad
Page Builder	Niche taxonomy, Meta OAuth profile data	Feeds niche context to Discover, audience data to Store & AI
Discover & Create	Page Builder (niche, objectives, competitor targets)	Feeds created scripts/captions into Planner and Automation DMs
Instagram Automation	Store & Commerce (product checkout links delivered via DM)	Feeds lead count and trigger metrics to Home and AI Assistant
Store & Commerce	Page Builder (audience targeting), Winning Products catalog	Pushes real-time transaction revenue into Home Revenue Tracker

Mandatory QA Verification Checklist

- ✓ **Zero-States Everywhere:** Every widget, graph, and list handles new accounts with zero data cleanly, showing guidance rather than empty/broken charts.
- ✓ **Soft-Lock Plan Gating:** Free-tier restricted features always show blurred preview + lock icon + contextual upgrade dialog (never broken buttons).
- ✓ **Credit Metering Safety:** 80% warning banner and 100% block next prompt (never cut off an in-progress AI generation mid-sentence).
- ✓ **Multi-Page Isolation:** Switching active page in top navbar immediately and correctly updates all data across Home, Builder, Discover, Automation, and Store.
- ✓ **Meta API Compliance & Rate Limits:** Automation queue implements backoff delay to prevent Instagram messaging rate limits and account suspension risks.
- ✓ **Dual Onboarding Integrity:** Beginner path (Niche quiz) and Existing creator path (OAuth import) route flawlessly without leaking or assuming page presence.

Milestone Review Protocol: Development proceeds sequentially phase-by-phase. Each phase is implemented, built, visually inspected in the browser, and presented to the founder for formal review and sign-off before proceeding to the subsequent phase.
